

Reminder: Comments Due Dec. 2 on Proposed Terminal Pier S draft environmental study outlines project

November 29, 2011

Written comments are due December 2 on a draft environmental study of Pier S, a proposal to develop a state-of-the-art, \$650 million container shipping facility on Terminal Island.

Written comments can be submitted until 4:30 p.m, Friday, December 2, 2011, to Richard D. Cameron, Director of Environmental Planning, 925 Harbor Plaza, Long Beach, 90802; or Cameron@polb.com.

The proposed Pier S shipping terminal development on a vacant 160-acre parcel would utilize the latest technology and practices for reducing air pollution from cargo operations. The new facility would generate and sustain up to 40,000 new permanent jobs in the region, as well as thousands of temporary construction jobs.

The Port released the draft environmental impact statement (DEIS) and supplemental environmental impact report (SEIR) on September 16, analyzing the impacts of the proposed development, and the mitigation measures that would be used to address those impacts.

For more information on the project, including electronic versions of the environmental reports, go to [www.polb.com/Pier S](http://www.polb.com/Pier_S).

The environmental documents are available for review at:
